Art Unit: 2832

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Waggener.

Waggener discloses the claimed invention at claim 4 and the disclosure, with a substrate, contacts, a single metal film resistive layer of niobium (nontantalum), a passivation layer, and then a layer of tantalum pentoxide.

Claims 7-10, 12-13, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Collins in view of Waggener or admitted prior art (APA Fig. 1). Collins discloses, except the chip form of the resistor, the claimed invention at Figs. 4-7 with nichrome resistor 16, tantalum oxide layer 14 and terminals 24. Waggener discloses chip resistors at Fig. 9, where the cut resistors of Example II are also chip resistors, for the purpose of making resistors.

Applicant also admits chip resistors are known by way of Fig. 1. Waggener at the top of col. 3

Art Unit: 2832

discloses that oxides can be sputtered so that sputtering would have been obvious to replace the anodizing process in order to control the thickness of the oxide for example, meeting claim 12. For claim 15, Collins does not disclose the extra passivation layer or chip, the latter addressed above. Waggener discloses at claim 4 as noted above, the extra passivation layer as noted at col. 3 for the purpose of providing extra protection to resistors such that it would have been obvious to provide an extra layer for protection.

Applicant's arguments filed 6/16/03 have been considered but are moot or not persuasive as to claim 16. Applicant argues as to claim 16 that Waggener does not disclose that tantalum pentoxide is deposited on a non-tantalum conductive layer. This is not correct as claim 4 of Waggener discloses, with the outer moisture barrier layer of tantalum pentoxide.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
